COORDINATION CHEMISTRY REVIEWS

NMR of Paramagnetic Substances

Ivano Bertini and Claudio Luchinat

Contents

	Preface	ix
Chapter 1	Introduction	1
Chapter 2	The hyperfine shift	29
Chapter 3	Relaxation	77
Chapter 4	Hyperfine shift and relaxation in the presence of chemical exchange	111
Chapter 5	Magnetic coupled systems	131
Chapter 6	Nuclear Overhauser effect	163
Chapter 7	Two-dimensional spectra and beyond	185
Chapter 8	Considerations on high resolution solid state NMR in paramagnetic molecules (S. Aime, I. Bertini and C. Luchinat)	221
Chapter 9	Hints on experimental techniques	243
Appendix I	NMR properties of nuclei	266
Appendix II	Derivation of the equation for contact shift	270
Appendix III	Derivation of the pseudocontact shift in the case of axial symmetry	272
Appendix IV	Derivation of the equations related to NOE	275
Appendix V	Simulation of NMR spectra (I. Bertini, C. Luchinat and A. Rosato)	278
Appendix VI	Reference tables	290
	Subject index	293
